Education

Dr. A.P.J. Abdul Kalam Technical University, Uttar Pradesh

2025 – 2029

Bachelor of Technology - Computer Science and Engineering

Relevant Coursework: Object-Oriented Programming, Data Structures, DBMS, Computer Networks, Web Development

Skills

Languages & Frameworks: JavaScript, HTML, CSS, React.js, Node.js, Express.js, EJS, Bootstrap, Tailwind CSS

Databases: MongoDB, Mongoose

Tools & Platforms: Git, GitHub, VS Code, Vercel, Postman, Chrome DevTools, npm

Core Concepts: REST APIs, CRUD Operations, Authentication, Responsive Web Design, API Integration, Deployment

Academic Projects

StyleLoom - MERN Ecommerce Platform

[GitHub](#) | [Live](#)

React.js, Node.js, Express.js, MongoDB, Razorpay, JavaScript, Vercel

- Developed a full-stack ecommerce platform with customer storefront, admin panel, product management, cart, authentication, and orders.
- Integrated COD and Razorpay order flow with backend APIs and MongoDB models for storing user, cart, and order data.
- Redesigned product, collection, cart, checkout, login, orders, and admin pages with responsive layouts and cleaner user flows.

WanderBoss - Travel Listing Web App

[GitHub](#) | [Live](#)

Node.js, Express.js, MongoDB, Mongoose, EJS, Passport.js, Cloudinary, Mapbox

- Built a full-stack travel listing web app with authentication, listing CRUD, owner authorization, reviews, and image uploads.
- Integrated MongoDB/Mongoose models, Passport.js sessions, protected routes, and server-side validation for reliable data flow.
- Added Cloudinary/Multer image uploads, Mapbox location display, centralized error handling, and deployment-ready structure.

Weather Dashboard - API Based Web App

[GitHub](#) | [Live](#)

HTML, CSS, JavaScript, OpenWeather API, Geolocation API, Moment.js, Vercel

- Built a responsive weather dashboard using OpenWeather APIs for current weather, 5-day forecast, hourly forecast, AQI, and city search.
- Implemented geolocation, reverse geocoding, and dynamic UI updates from API responses using JavaScript and DOM manipulation.
- Displayed weather metrics including humidity, pressure, visibility, wind speed, sunrise/sunset, and feels-like temperature.

Achievements & Activities

- Achieved **2nd position** among 7 teams at Zonex 2026 Hackathon for building an Event Management Web App.
- Built event creation, scheduling, participant management, and tracking/reporting features during the hackathon.

Technical Highlights

- Developed and deployed full-stack and API-based web projects with live demos, GitHub repositories, responsive interfaces, and documentation.
- Implemented authentication, CRUD workflows, API integration, form handling, database connectivity, and deployment debugging across projects.
